

“Tutto dalla nostra terra”

The Authentic Nature of the Estate

We are happy to welcome you to our Estate, a place where nature is the real protagonist. Here we cultivate and breed in full respect of the environment, without using pesticides or chemicals. For this reason, you may meet some small guests from the countryside, such as a curious ant, a passing snail or a wasp attracted by the scents of nature.

These small animals are an integral part of the ecosystem that we protect every day:

- a sign of a healthy and uncontaminated environment
- concrete proof of our commitment to biodiversity
- a guarantee that our products are truly organic and natural

We ask you to welcome these little visitors with the same philosophy with which we welcome them: they are ambassadors of nature that we are committed to preserving for you and for future generations.

Thank you for sharing this respect for the earth with us.

Tenuta Ara del Tufo – “Tutto dalla nostra terra”, in full respect of nature.
